Statistical Register of South Australia, 1930-31.

Part II.—POPULATION AND VITAL.

Report of the Government Statist and Registrar-General of Births, Deaths, and Marriages on Population and Vital Statistics for the year 1930.

POPULATION YEAR 1930.

State.—On December 31st, 1930, the population of the State was estimated to be 582,127 (580,271), an increase of 1,856 (923) for the year. Except for 1929 and the war years, this is the lowest increase since 1903. Males numbered 300,506 and females 281,621.

Metropolitan Area.—The population of the metropolis on December 31st, 1930, was estimated to be 324,420 (324,898), a decrease of 478, and representing 55·73 (55·99) per cent. of the population of the whole State.

An area approximately within a 10-mile radius of the G.P.O., Adelaide, is called the metropolis and embraces the cities of Adelaide (36,900), Unley (41,415), and Port Adelaide (33,367), and the corporate towns of Brighton (5,462), Colonel Light Gardens (5,600), Glenelg (9,816), Henley and Grange (5,047), Hindmarsh (13,671), Kensington and Norwood (15,591), St. Peters (11,775), and Thebarton (14,543), and the district councils of Burnside (23,329), Campbelltown (3,679), Marion (6,927), Mitcham (17,457), Payneham (7,622), Prospect (20,107), Walkerville (4,734), West Torrens (16,728), Woodville (25,671), and Yatala South (4,979).

Sources of Increase.—The natural increase (excess of births over deaths) for the year was 5,133 (5,626) or 0·89 (0·97) %, being the lowest per cent. increase recorded. There was a loss of 3,277 (4,703) or 0·57 (0·81) % by migration, 925 with oversea countries and 2,352 with other States, thus reducing the gain of 5,133 by natural increase to a net gain only of 1,856 for the year, equal to 0·32 (0·16) %.

Migration.—For the year 1930, 47,471 (62,265) persons departed from the State and 44,194 (57,562) arrived, loss 3,277. South Australia's net loss to New South Wales was 1,332, and to Western Australia, 499. The principal countries were:—Commonwealth States—Arrived 42,444 (54,783), departed 44,796 (59,386); United Kingdom—Arrived 943, departed 1,724; France—Arrived 183, departed 134; Germany—Arrived 30, departed 10; Italy—Arrived 190, departed 322; Egypt—Arrived 92, departed 92; South African Union—Arrived 40, departed 84; India and Ceylon—Arrived 239, departed 166.

Out of the 3,995 aboriginals, 780 were reported as employed (545 males, 235 females); 836 are on mission stations, including 140 employed.

Census, April 4th, 1921.—The population as at the last Census (1921) was 495,160 (for the report in detail see the 1927-28 issue of the Statistical Register). The next Census, which was to have been taken on June 30th, 1931, has been postponed for 2 years.

Naturalisation.—During the year 113 (92) aliens were naturalised in the State. Germans 13, Italians 45, and Greeks 33.

Building Operations.—(*a*) Number—In the metropolitan area permits for the erection of 264 (1,110) dwellings were issued, a decrease of 846. There has been a great falling off in the number of permits since 1927, the average annual number for the three year period ended 1930 was only 1,018, compared with 3,244 for the previous period of three years ended 1927. The maximum number for any year was 3,543 in 1926. (*b*) Values—The estimated total value of all new buildings, including alterations, was £515,843 (£1,545,337), decrease £1,029,494. The average annual value for the three year period ended 1930 was £1,613,995, compared with £4,190,885 for the previous period. The maximum amount was £4,408,433 in 1926.

The following are the particulars for the whole of the State :—

VITAL STATISTICS, YEAR 1930.

BIRTHS.

Numbers for State.—In 1930 the births registered numbered 9,984 (10,665), a decrease of 681 and 1,317 less than the mean of the previous five years. It was the lowest number since 1908 (9,756).

Numbers Metropolitan Area and Country.—The births in the city and suburbs for 1930 numbered 4,643, and in the country districts 5,341, the respective rates per 1,000 mean population being 14·30 and 20·90. NOTE.—Births are classified according to the usual residence of the mother.

Multiple Births.—Twin births numbered 111 (101). Males 110 (121) and females 112 (81). There were two sets of triplets in 1929 but none in 1930. In 1919 there was one quadruple birth of four males, and for the ten years 1921 to 1930, seven sets of triplets and 1,210 of twins.

Sexes.—Males numbered 5,100 (5,524) and females 4,884 (5,141). The males always exceed the number of females born, the average number of males born to every 100 females for 1930 being 104·42 (107·64), being 3·22 greater than the previous year.

Ex-Nuptial Births.—337 (319) were registered during the year. The percentage on total births registered was 3·38 (2·99). The percentage of ex-nuptial births in this State for many years has been much lower than that of any of the States or New Zealand.

Legitimations.—23 (38) were legitimated under the Act during the year.

Still-Births.—In this State the law does not at present provide for the registration of still-births. Certificates of the stillborn are issued by the Departmental Registration Officers for Maternity Allowance, and from this source the following numbers have been ascertained. They give an indication of the probable number for the State :—1925, 296 ; 1926, 317 ; 1927, 285 ; 1928, 290 ; 1929, 334 ; 1930, 232.

Adoptions.—The Adoption of Children Act of 1925 was brought into operation in October, 1926—for the balance of that year 160 children were adopted :—1927, 198 ; 1928, 127 ; 1929, 119 ; 1930, 96.

Natural Increase.—The annual natural increase—excess of births over deaths—for the five years 1925-1929 was 1·11 percentage of the population. For the five years immediately preceding (1920-1924) it was 1·37 per cent., and for the pre-war period (1910-1914) it was 1·77 per cent. For the year 1930 it was 0·89 per cent.

Crude Birth Rates.—The birth rate per 1,000 of mean population for 1930 was 17·19 (18·40). Each succeeding year of the last nine years has been the lowest in the record of the State. Fortunately the death rate has also fallen during the last nine years from 10·02 to 8·35 and thus lessened the effect of the rather substantial fall in the crude birth rates.

Rate per Number of Women 15-44 Years of Age.—The rates referred to in the previous paragraph have been calculated as is usual on the total population, but are termed " crude " for a more reliable method is to base the rate on the number of women of child-bearing ages living during the year. These numbers are only known with exactitude at the Census periods. It has been assumed in the following calculation that the number of married women between ages of 15 and 44 years living in each of the years 1920-1929 was in the same ratio to the total population as for the Census 1921. The mean annual birth rate (excluding ex-nuptial births) per 1,000 married women between the child-bearing ages of 15 and 44 estimated as living in each year was for the period 1920-1924, 181·93, and for the latest five years 1925-1929, 159·63, a fall of 22·30 per 1,000, or 12·3 per cent. compared with the fall in the crude rate for the same periods of 14·6 per cent, a difference of 2·3 per cent. The rates for the last three census years have been—1901, 235·02 ; 1911, 237·74 ; and 1921, 187·85.

MARRIAGES.

Number of Marriages.—3,312 (3,719) marriages were registered for the year 1930, a decrease of 407, and 913 less than the mean of the five previous years, The rate per 1,000 mean population was 5·70 (6·42), being the lowest since 1897 (5·55).

Officiating Ministers.—At the close of the year there were 701 Ministers of Religion and 31 Registrars enrolled with power to celebrate marriages. The Act provides that when a marriage is celebrated by a minister he must send within seven days, one certificate to the District Registrar and one certificate with licence, &c., to the Registrar-General, and at the end of each quarter a statement of all the marriages celebrated by him during such period.

Of the total marriages for the year Methodist Ministers celebrated 1,054, or 31·8 per cent.; Church of England, 742, or 22·4 per cent.; Roman Catholic, 386, or 11·7 per cent.; the Registrars celebrated 319, or 9·6 per cent. There were decreases in all denominational marriages, but an increase of 57 in civil marriages.

The following table gives further particulars:—

Marriages in each Denomination and Ministers Enrolled.

Conjugal Conditions of those Marrying.—Bachelors 3,037 (3,420), spinsters 3,108 (3,508), widowers 220 (257), widows 154 (174), divorced men 55 (42), divorced women 50 (37).

Of the 3,037 (3,420) bachelors, 2,925 (3,291) married spinsters, 81 (104) married widows, and 31 (25) married divorced women.

Of the 220 (257) widowers, 143 (181) married spinsters, 63 (68) married widows, and 14 (8) married divorced women.

Of the 55 (42) divorced men, 40 (36) married spinsters, 10 (2) widows, and 5 (4) divorced women.

Ages of those Marrying.—The number marrying at each of the following age groups were;—Under 21 years of age, 189 males, 807 females; 21 years and under 45 years, 2,899 males, 2,377 females; 45 years and upwards, 224 males and 128 females. Total 3,312 males, 3,312 females.

The mean age of those marrying for the year was for males 28·82 (28·54), and females 25·84 (25·32). These means have only varied by decimal points for years, the tendency being a slight decline, until 1930.

Numbers Over 70 Years of Age.—During the year 18 (17) persons married being over the age of 70 years, 14 were males and four females.

Marriages of Minors.—The written consent of a parent (the father if alive) is necessary in the case of a marriage of a person under 21 years of age. During the year 996 (1,034) minors were married representing 15·0 (13·9) per cent. of the total persons marrying. The numbers at each age were as follows:—

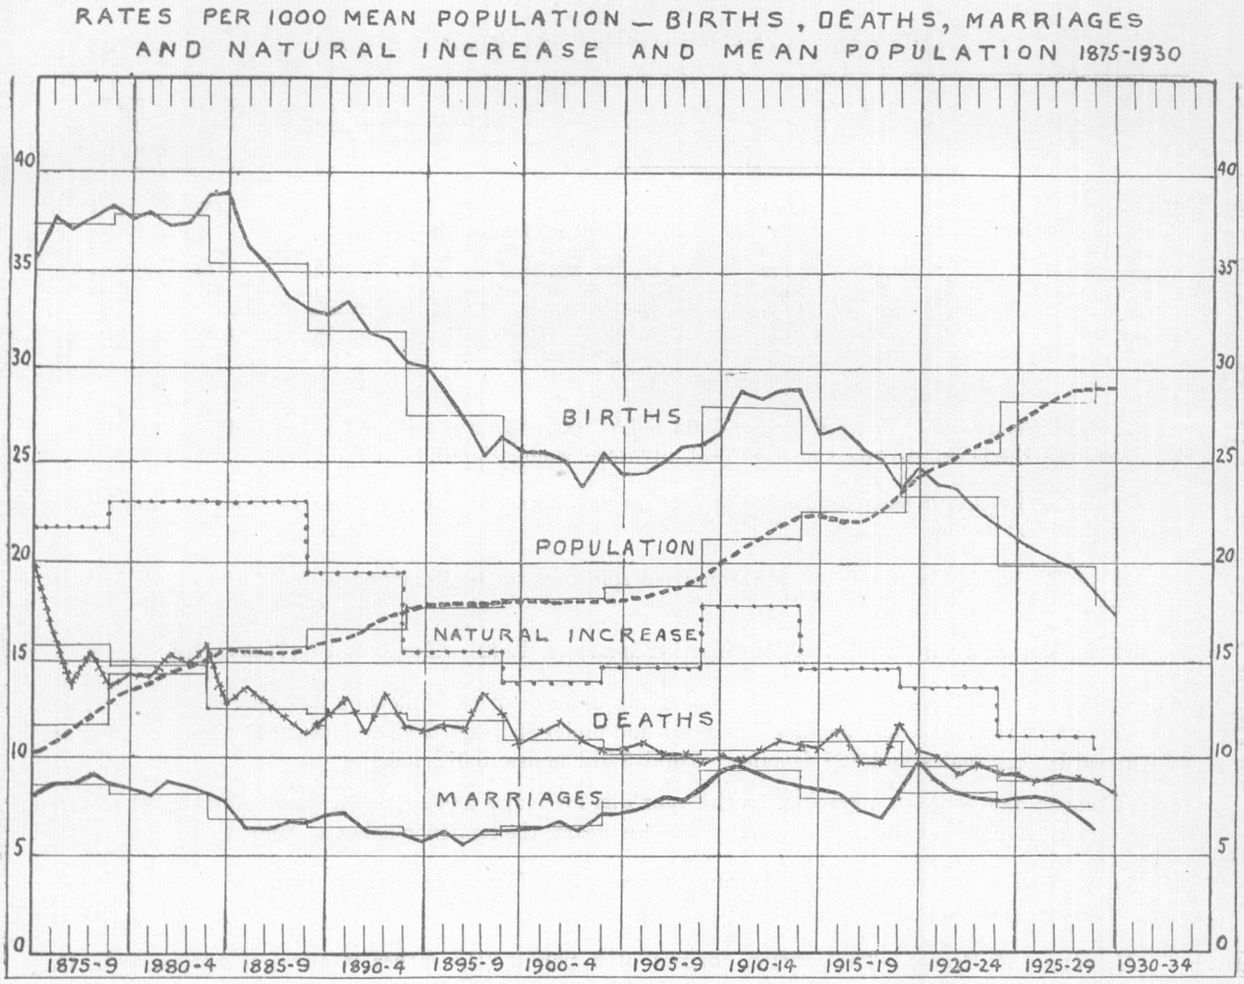
	14.	15.	16.	17.	18.	19.	20.	Total.
Males	— (—)	— (—)	1 (1)	11 (4)	28 (24)	60 (59)	89 (112)	189 (200)
Females	— (—)	5 (6)	39 (50)	112 (91)	177 (171)	226 (230)	248 (286)	807 (834)

Divorces.—148 (107) marriages were dissolved by divorce and decree of nullity during the year. The increase has been considerable since the war. For the five years 1910-1914, the annual average was 12·2; 1915-9, 19·0; 1920-4, 73·2; and for the last five years, 1925-9, 94·8.

Marriage Rates per 1,000 *of Mean Population.*—The annual rates per 1,000 of mean population for quinquennial periods from 1900-1929 and the years 1928 to 1930 were as follows:—

Period.	Rates.	Period.	Rates.	Period.	Rates.
1900-1904.....	6·59	1915-1919	7·94	1928.....	7·18
1905-1909.....	7·93	1920-1924	8·53	1929.....	6·42
1910-1914.....	9·38	1925-1929	7·46	1930.....	5·70

The marriage rate for 1930—5·70 is the lowest since 1897—5·55, and the annual mean of the five years ended 1929, 7·46, is lower than the four preceding quinquennial periods. The pre-war period 1910-1914 had the high annual average of 9·38.



Explanation of Graph.—The base of each small rectangle represents the years, and the annual means of quinquennial periods are also shown. The figures to the left and right of the diagram represent the marriage, birth, death, and natural increase Rates per 1,000 of mean population. For the mean population of each year and quinquennial period the figures must be multiplied by 20,000.

DEATHS.

Numbers for State.—The deaths registered during the year numbered 4,851 (5,039), a decrease of 188 and 183 less than the mean of the five previous years. Males numbered 2,609 (2,799), a decrease of 190, and females 2,242 (2,240), an increase of 2.

Metropolis and Country.—3,003 deaths occurred in the metropolitan area and 1,848 in the remainder of the State. The rates per 1,000 population were—Metropolis, 9·25; remainder of State, 7·22. NOTE.—Deaths are classified according to the usual residence of the deceased person.

Crude Death Rate per 1,000 *of Mean Population.*—The death rate of total registrations for 1930 was 8·35 (8·70), being the lowest on record. It is gratifying to record a substantial decrease in the rate during the last eleven years, it being 11·69 in 1919.

The annual mean rate per 1,000 of population for the quinquennial period, 1900-1904, was 10·99. For the period 1920-1924 it fell to 9·66, and for the five years 1925-1929 to 8·89, a decrease of 2·10 from 1900-1904. This fall helped to counter the effect of the regrettable fall in the birth rate upon the net natural increase in population. The net natural increase fell from an annual mean of 14·06 per 1,000 of population for the years 1900-1904 to 11·07 for the years 1925-1929, a decrease of 2·99.

Death Rate of Sexes.—The annual mean crude death rates for the period 1900-1904 was 12·04 per 1,000 of population for males and 9·94 for females, and for the period 1925-1929, 9·47 for males and 8·28 for females. The death rate of males is thus seen to be much higher than for females and to have fallen since the period 1900-1904 by 2·57 and females by 1·66 per 1,000 of population, equal to 21·35 per cent. for males and 16·70 per cent. for females.

The following are the particulars for the period 1900 to 1930 :—

Deaths of Centenarians.—The deaths of one male at 104, one female at 100, and two females at 103 were registered for the year. The previous year there was one male at 100 and no females.

Deaths in Age-groups.—482 (436), or 9·94 (8·65) per cent., of the total deaths occurred within the first year of life, and 655 (560), or 13·50 (11·11) per cent., within five years of life; 853 (763), or 17·58 (15·14) per cent. of the total were under 20 years of age, and 1,694 (1,780), or 34·92 (35·32) per cent., were 70 years and over. The following are the particulars of the deaths in age-groups :—

Causes of Death.—The Statistical Classification of the Causes of Death adopted is in accordance with the International List of Causes of Death as revised in 1920.

The number of deaths, male and female, from each of the causes set forth in such list, and in the age-groups decided upon by the Conference of Statisticians and Health Authorities in 1928, have been classified and may be found in Tables Nos. 38 and 39 of this Section of the Statistical Register. The principal causes only can be referred to in this report, and are set forth in the following table in order of numerical greatness in 1930. The percentage of each to the total deaths and the rates of each per 10,000 of population are also shown.

Diseases of the Heart.—From the foregoing it is noted that diseases of the heart, account for the greatest number of deaths, though the rate per 10,000 of mean population since 1910 has varied but little except during the war period when it increased. In quinquennial periods the average annual rates per 10,000 of population were :—1910-1914, 11·11 ; rising in the war period 1915-1919 to 12·16 ; 1920-1924, 10·66 ; and 1925-1929, 10·44.

For the year 1930 the deaths totalled 604 (627), decrease 23, the number being equal to 12·45 (12·44) per cent. of the total deaths and 10·40 (10·82) per 10,000 of the mean population.

Cancer and Tuberculosis.—Up to the year 1917, with the exception of the year 1914, the death rates from cancer were less than from tuberculosis of all kinds, but from that year to the present the death rate from cancer has increased, whilst the death rate from tuberculosis (all kinds) has decreased. In 1910 the death rates from tuberculosis of the respiratory system fell below those of cancer and have continued to fall, whilst the rates for cancer continued to rise. These fluctuations are seen in the graphs on page 9.

The following are the comparative particulars for the years 1910 to 1930 :—

1930 (")	292	5·03	4·44	593	10·21

From the foregoing table it is noted that the deaths per 10,000 of population from tuberculosis averaged annually 8·65 for the period 1910-1914, and those for cancer 7·94, or ·71 less than tuberculosis, whilst the annual averages for the last five years, 1925-1929, were—Tuberculosis, 6·43 and cancer 9·80, the rate for cancer being 3·37 above tuberculosis for the latter period, whilst for the year 1930 the average per 10,000 of population from tuberculosis was only 5·03 and from cancer 10·21.

Tuberculosis of the Respiratory System.—Out of the total deaths from tuberculosis of all kinds 292 (343) for the year 1930, tuberculosis of the respiratory system caused 258 (301) deaths, or 88 (88) per cent. The rates for the two years were 1930, 4·44, 1929, 5·19; a considerable fall on previous years. For the period 1910-1914 it was 7·18, or greater by 2·74, per 10,000 of population than in 1930.

Cancer—Seat of Disease.—Cancer of the stomach and liver 177 (223), 108 (136) males and 69 (87) females, and cancer of the peritoneum, intestines, and rectum 119 (110), 53 (54) males and 66 (56) females, are the two chief seats of the disease, the former being 29·85 per cent. (35·11 per cent.) and the latter 20·07 per cent. (17·32 per cent.) of the total cases of deaths from cancer.

The following are the numbers and proportions per cent. of the seats of disease to the total for each of the last five years.

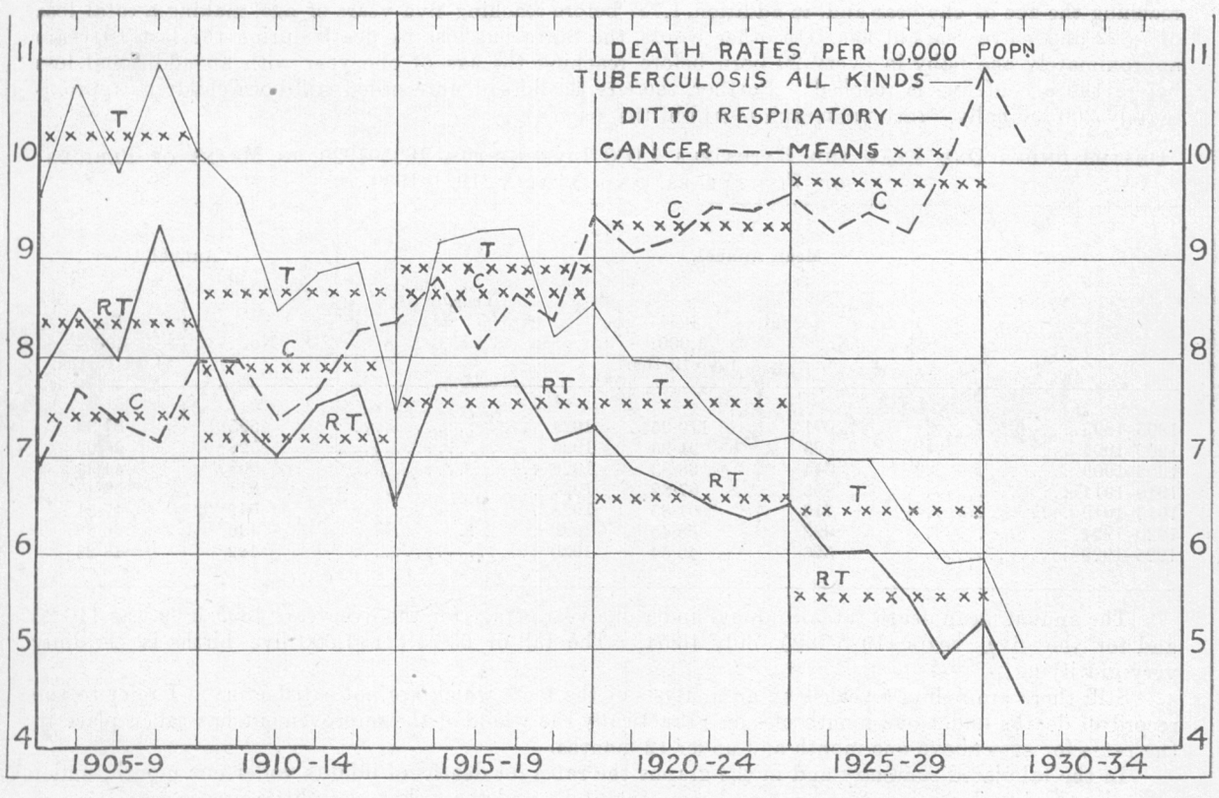
The annual rates and quinquennial means, per 10,000 of mean population for both tuberculosis and cancer for each of the years 1905 to 1930 are shown in the following graph :—

DEATH RATES TUBERCULOSIS AND CANCER 1905-9 – 1930-34



Explanation of Graph.—The figures to the left and right of the diagram represent the rates per 10,000 of mean population, and these rates are plotted for each of the years 1905 to 1930 with the means for each of the quinquennial periods 1905-9 to 1925-9 marked off at base. The letters "C" signifies cancer, "T" Tuberculosis of all kinds, "R.T." Tuberculosis of the Respiratory System.

Pneumonia.—Total deaths 173 (216), rate 2·98 (3·73). The annual rate for the period 1910-14 was 3·84, and for the period 1925-29, was 4·13, an increase in the latter period over the earlier of 0·29 per 10,000 of population.

Bronchitis, Acute, Chronic, and Unspecified.—Total deaths 80 (114), rate 1·38 (1·97). Bronchitis averaged annually the five years 1925-1929, 1·73 per 10,000 population, and 2·93 for the years 1910-1914, a decrease of 1·20 per 10,000 of population.

Other Respiratory Diseases.—Excluding the deaths from pneumonia, 173 (216); and bronchitis, 80 (114), the total deaths from other respiratory diseases numbered 255 (248), the principal causes being—Broncho-pneumonia, 154 (136); pleurisy, 18 (25); congestion and haemorrhage of lungs, 44 (48); asthma, 15 (8).

Epidemic, Endemic, and Infectious Diseases.—These classes of disease were responsible for 420 (457) deaths, which includes the 292 (343) deaths from tuberculosis already reviewed. The remaining chief causes were:—Typhoid fever, 7 (4); whooping cough, 38 (1); diphtheria, 2 (13); influenza, 9 (28); dysentery, 18 (9); syphilis, 11 (17).

Notifiable Infectious Diseases.—Certain proclaimed infectious diseases are notifiable under the Health Act to the Central Board of Health. A total of 8,947 (7,566) cases were reported during the year.

The principal diseases were diphtheria, 245 (329); typhoid fever, 87 (59); erysipelas, 226 (152) measles, 2,466 (4,233); puerperal fever, 75 (73); pulmonary tuberculosis (phthisis), 425 (458); scarlatina and scarlet fever, 104 (238); whooping cough, 4,466 (497); chicken pox, 739 (999); influenza, 23 (495); dysentery, 53 (12).

Cerebral Haemorrhage, Embolism and Softening.—Total, 373 (350). The annual rate per 10,000 of population for the five years, 1925-29, was 5·74. For the period 1910-1914 it was 3·95, 1915-1919, 4·71, and 1920-1924, 5·60. Thus it is seen the increase has been continuous. For 1930 it was 6·41 (6·04).

Diabetes Mellitus.—86 (87). Males 32 (33), females 54 (54). Of the total 73 (75) were 50 years of age and over.

Puerperal Diseases, Accidents of Pregnancy and Confinement.—Total 50 (52). Of this number 15 (16) were recorded as due to puerperal septicaemia. The rate is equal to 5·01 (4·88) per 1,000 births.

External Causes.—Total 374 (354). The principal causes were—Suicides, 65 (72), equal to a rate of 1·1 (1·2) per 10,000 of population; accidental drowning, 46 (27); automobile accidents, 60 (71); traumatism by falls, 44 (51); homicides, 12 (12); excessive heat, 28 (2).

Infantile Mortality.

There were 482 (436) deaths of infants under one year of age, an increase of 46. The average per 1,000 live births was 48·28 (40·88), which has only been lower in five previous years. For many years South Australia, in common with the other States of the Commonwealth and New Zealand, has had a very low mortality rate for infants under one year of age compared with other countries. But even so the economic loss to the State is considerable, for in the last 10 years 5,765 infants died before reaching the age of one year and, in addition, 1,757 before reaching five years of age, making a total loss of 7,522 under five years of age. In other words, the State has lost by death during the last 10 years approximately one baby in every 20 born before reaching the age of one year with an additional loss before the age of five is reached. Further, there is the loss of unrecorded still-born children, approximately 300 annually. (See paragraph *re* still-births, page 4).

Deaths under One Year and Rates per 1,000 Live Births, 1895–1929, in Means of Periods of Five Years, and Yearly 1924–1930.

1925–1929	526	46·54	1930	482	48·28

The annual mean death rate of infants under one year of age for the five years 1895-1899 was 110·25 and for the five years, 1925-1929, only 46·54. The fall of 63·71 per 1,000 live births is certainly very gratifying.

Still there are points revealed by an analysis of the facts which are not satisfactory. I refer to the record of deaths under one month of age. Practically the whole of the improvement has taken place in the rates for ages above one month and under 12 months.

In the tabulated summary and in the graphs the rates for deaths of infants under one month, under one week, and under one day of age are shown separately, and these show very little progress.

Under one month for the period 1900-1904 the mean rate was 32·85, and 1925-29, 27·08, a fall of only 5·77, whilst for the ages one month and under 12 the rates for the same period were 59·10 and 19·46, a fall of 39·64. Further, during the last period, of the total number (1,531) dying within one month of life 1,149, or 75 per cent., died before reaching the age of one week, and 575 or 38 per cent. of the 1,531 were less than one day old. The great majority of those dying under one month of age died from pre-natal causes.

The annual mean number and annual mean rates per 1,000 births of infants dying within the following ages were as follows :—

Explanation of Graph.—The bases of the small rectangles represent the years, and the annual means for the quinquennial periods are also shown. The figures to right and left represent the rate per 1,000 live births.

Pre-natal Causes of Death.—Code Nos. 159, 160, 161A, 161B, and 162. During the five years, 1925–29, deaths from malformations, congenital debility, premature births, and other diseases of early infancy which may be termed "Pre-natal Causes" accounted for 1,609 deaths, or 61 per cent. of the total dying within one year of age compared with 43 per cent. for the period 1910-14. Nearly all of these deaths occurred within one month of birth. Deaths from diarrhœal diseases for 1925-29 were 282, or 11 per cent. compared with 26 per cent. for 1910-14, and other diseases 738, or 28 per cent. compared with 31 per cent.

The average percentage of loss from pre-natal causes is greater for the period 1925-29 than for the previous three quinquenniums. These facts indicate the direction in which efforts for the saving of infant life should be directed.

Sexes.—The number of boys dying before reaching one year of age for the last five years numbered 1,455 and girls 1,128, the deaths of boys being 29 per cent. greater. For 1930—of the total deaths 482 (436)—263 (262) were males and 219 (174) were females.

Care of Infant Life.—The Mothers' and Babies' Health Association, formerly called "School for Mothers Institute and Babies' Health Centre," has 44 branches in the State; 38 of which are in the metropolitan area. The Government makes an annual grant of £2,500 to the Association. During the year ended July 31st, 1930, the nurses paid 2,389 visits to expectant mothers and 36,082 to young babies. Baby clinics are also established in the State, and during 1929-30, 66,216 examinations of babies brought by mothers were made and advice given when necessary. There is a creche in the city where babies may be left during the day whilst the mothers are earning their own living.

INDEX OF MORTALITY.

The death rates previously quoted in this Report are crude rates, being the numbers per one thousand of the mean population, and do not take into account the sex and age constitution of the people. In order to compare the mortality of various countries on a uniform basis, the sex and age distribution of a standard population compiled by the International Institute of Statistics is used in computing an Index of Mortality. The index for South Australia for 1930 was 8·69, compared with 1921—10·38, 1922—9·39, 1923—9·90, 1924—9·50, 1925—9·43, 1926—9·02, 1927—9·30, 1928—9·23, and 1929—8·99

ANATOMY ACT, 1884.

The Inspector of the School of Anatomy reported, under Clause 6, that 13 (12) bodies had been removed to the University School of Anatomy for anatomical examination.

Statistical Register of South Australia, 1930-31.

Part IV.—TRADE, TRANSPORT, AND COMMUNICATION.

REPORT OF GOVERNMENT STATIST ON TRADE FOR 1930-31.

The values given herein of goods imported from countries beyond the Commonwealth represent the amount on which duty is payable, or would be payable if duty were *ad valorem*. The value of goods subject to duty is taken to be the fair market value in the principal markets of the country whence the same were exported, with an addition of 10 per cent. to such value to cover insurance, freight, and other charges to place of landing. The value of goods exported is in general the value in the principal market of the State in the ordinary commercial acceptation of the term.

All figures in parentheses are those for the previous year, inserted for comparative purposes.

Total Trade Values (*Recorded Values*).—The grand total value of trade for the year was £10,399,768 less than the previous year, the respective totals being £13,977,085 (£24,376,853), equal to £24 0s. 3d. (£42 0s. 2d.) *per capita*, the lowest since 1917-18.

Imports (*British Currency Values*) totalled £3,915,550 (£9,367,357), a decrease of £5,451,807, the total value averaging £6 14s. 6d. (£16 2s. 10d.) *per capita*, the lowest ever recorded. Owing to the levying of higher tariff duties and restrictions, there was a general curtailment of oversea imports and marked decreases were noted in apparel, attire, and textiles, motor chassis, petrol, machinery, iron and steel, timber, paper, stationery, bags and sacks. The estimated value of imports in Australian currency for the year 1930-31 was approximately £4,400,000.

Exports (*Australian Currency Values*) totalled £10,061,535 (£15,009,496), decrease £4,947,951, the total value averaging *per capita* £17 5s. 8d. (£25 17s. 4d.), the lowest since 1917-18. The substantial fall in the prices of our export commodities hides the fact that the volume of merchandise was really increased. This is readily observed from the results of applying last year's unit values to the quantities exported this year—had these prices been maintained, our exports (ex specie) would have shown a 9 per cent. aggregate increase, or £1,160,000, instead of a decrease of £3,500,000. The serious offset of falling prices is thus made clear. Record shipments overseas were noted in the quantities of barley, eggs in shell, and raisins.

BALANCE OF TRADE AND INTERSTATE TRADE.

Balance of Oversea Trade, £6,145,985 (£5,642,139).—The recorded excess of exports over imports for the year 1930-31 was £6,145,985 (*i.e.*, if exchange were normal), as compared with £5,642,139 for the previous year 1929-30, an increase of £503,846. The excess of exports for the year 1930-31 is estimated at approximately £5,600,000 in Australian currency, or £4,770,000 in British currency values.

This balance is subject to qualification, as those intimately acquainted with trade statistics well know, but as many of the business public do not know, to avoid misunderstanding an explanatory note appears necessary.

The balance represents the result of the State's direct trade with oversea countries, but it includes Broken Hill products imported to this State and re-exported. South Australia only benefits on these to the extent of the added value as a result of treatment at Port Pirie and transit. South Australia does a heavy volume of trade with the other States, a complete record of which is unfortunately impossible. If known it is probable that the adverse interstate balance would substantially reduce the oversea credit balance.

Interstate Trade of South Australia.

With the aid of the Railway and Harbor Departmental records and the courtesy of traders the Government Statist has for some time past been accumulating much useful data as to our Interstate trade, which indicates definitely that this State does a fairly substantial export trade to other States, as follows:—Wine and brandy, £573,835 (£850,000); motor bodies, £405,023 (£1,400,000); wheat, barley, and flour, £378,843 (£700,000); bark and salt, £130,527 (£270,000); and iron ore, £449,203 (£530,000). Substantial export trade is also done in metal manufactures, cheese, soap, bacon and ham, jams leather, gypsum, &c. Not much information is available as yet regarding imports, but coal and sugar would total approximately £1,781,299 (£1,600,000), less exports of same to Broken Hill and Western Australia. Apparel and attire would probably be a heavy item, also livestock and wool. Timber from Western Australia in 1930-31 was valued at £25,439 (£90,149).—See Return Nos. 13, 16, and 17.

Trade with Western Australia.

In Western Australia complete records are kept of Interstate trade. A review of these has been made and the results should be informative to the local traders doing business with that State. For the year 1930-31 Western Australia imported from the States £6,802,053, of which this State contributed £505,505, or nearly 7½ per cent. Cannot this proportion be increased in view of the closer geographical

position? With this objective the products of trade have been reviewed, and some are set forth as follows, with the South Australian proportion in parentheses:—

Butter, £290,897 (£2,856); cheese, £87,530 (£16,832); bacon and ham, £108,523 (£26,938); sugar, £239,319 (£1,944); boots and shoes, £384,443 (£3,285); agricultural implements, £230,714 (£17,346); metal manufactures, £241,158 (£24,801); leather and leather manufactures, £58,475 (£12,572); soap, £65,739 (£11,654); pickles and sauces, £38,962 (£3,622); ale and beer, £81,086 (£22,146); jams and jellies, £125,939 (£14,047); raisins, £5,298 (£3,382); glass and glassware, £31,066 (£4,314).

In many of the foregoing items this State might probably secure a greater proportion of the business In the following items this State supplies either the total trade or nearly so:—

Eggs in pulp, £4,318; motor car bodies, £21,000; brandy, £5,545 (total, £7,475); wine, £47,453 (total, £60,574).

The balance of trade with Western Australia was in favor of this State for 1930-31 by £373,835; 1929-30 by £627,019, 1928-29 by £1,009,994; 1927-28 by £686,411; 1926-27 by £489,335.

Trade with Tasmania.

By the courtesy of the Tasmanian Statistical Office, details of the trade with this State have been supplied. For the year ended June 30th, 1931, the exports from South Australia to Tasmania were valued at £985,079 (£867,212), and the imports into South Australia from Tasmania, £253,635 (£364,142), a balance in favor of South Australia of £731,444 (£503,070). The principal lines were:—

DISTRIBUTION OF OVERSEA TRADE.

Imports from United Kingdom and Foreign Countries were less in value and percentage than those of 1929-30, and from other British Possessions though greater in percentage were less in value. The Exports to United Kingdom and other British Possessions were less both in percentage and value, and to Foreign Countries were less in value though greater in percentage.

EXPORTS.—DIRECT OVERSEA.

Exports.—The exports of the State are substantially the products of the agricultural, pastoral, dairying, and the smelting industries (see Return No. 5). The grand totals for the various groups were as follows :—

Groups of Exports.	1929-30.		1930-31.		Increase or Decrease (—).
	£	%	£	%	£
Breadstuffs	3,952,871	26	3,399,357	34	—553,514

Orchards and Vineyards	1,368,438	9	1,056,557	10	—311,881
Mining	4,605,276	31	2,827,874	28	—1,777,402
Miscellaneous	2,245,070	15	787,090	8	—1,457,980
Grand totals	15,009,496	100	10,061,535	100	—4,947,961

Breadstuffs.—£3,399,357 (£3,952,871), representing 34 (26) percentage of the total. Although greatly increased quantities of wheat and barley (a record) were shipped abroad, the fall in world prices caused a substantial decrease in total values. The principal items were wheat, 20,055,380 (11,864,498) bushels, value £2,621,895 (£2,996,746); barley, 2,867,932 (542,260) bushels, value £342,732 (£77,660); flour, 66,293 (86,017) tons, value £416,916 (£870,221).

Pastoral and Dairying.—£1,990,657 (£2,837,841), representing 19 (35) per cent of the total. Decrease £847,184. Lesser quantities and lower values for wool and sheepskins mainly accounted for this decrease. The chief items in the group were wool, 49,642,010 (53,544,666) lbs., decrease 3,902,656lbs, value £1,502,758 (£2,243,736), decrease £740,978; sheepskins, No. 1,212,788 (1,474,780), value £213,260 (£366,936), decrease £153,676; butter, 2,456,894 (659,061) lbs., value £119,604 (£50,922), increase £68,682; tallow, 22,989 (15,110) cwts., £27,517 (£25,492). Record shipments of eggs were noted, the totals being 772,680 (370,800) dozen, £41,301 (£21,795).

Orchards and Vineyards.—£1,056,557 (£1,368,438), representing 10 (9) per cent. of the total. The group shows a decrease of £311,881. The decrease in this group is due to the fact that only 29,633 cases of apples were shipped, against 651,255 cases for the previous year 1929-30. The principal items were currants, 13,311,513 (15,513,904) lbs., value £221,131 (£273,870); raisins (a record), 20,660,845lbs., £353,561 (18,609,301lbs., £332,520); wines, 1,837,986galls., £418,240 (1,840,539galls., £455,055).

Mining.—£2,827,874 (£4,605,276), representing 28 (31) per cent of the total. The products of this group are mainly of Broken Hill origin and smelted at Port Pirie. The decrease of £1,777,402 was mainly attributed to lower metal prices. Silver, 8,280,538 (8,913,671) ozs., value £545,279 (£846,971). Concentrates, 3,506,118 (3,991,691) cwts., value £708,203 (£941,000). Copper, 809 (79,057) cwts., value £527 (£90,979). Gypsum, 114,589 (82,615) cwts., value £5,395 (£4,151). Lead, 1,990,074 (2,192,036) cwts., value £1,462,335 (£2,316,031). Salt, 139,262 (106,215) cwts., value £15,182 (£17,472).

Miscellaneous.—£787,090 (£2,245,070).—The principal items in this group are sandalwood, £18,028 (£55,887); soap, £6,836 (£13,745); gums, yacca, £11,364 (£16,949). In addition £613,600 (£2,030,000 of gold specie was shipped abroad.

VOLUME OF OVERSEA EXPORT TRADE.

It is probably generally known, though often overlooked, that fluctuating prices from year to year nullify statistics of values of exports as an index of the actual volume of trade. From 1918-19 to 1929-30 the recorded values of the State's annual exports were millions of pounds greater than previously. This, from a currency viewpoint, was eminently satisfactory, but the fact remains that the substantial uplift was due to increased market prices and not to an increase of volume of trade. In the interest of the State this fact should be noted, for it is increased volume of production and volume of exports *per capita* that denote genuine progress. For 1930-31 prices were lower with a consequently lower recorded value.

For the purpose of ascertaining the actual position as to the volume of trade, the annual exports for each year from 1910 to 1930-31 have been revalued on the basis of the export mass prices of 1911. The total annual value thus obtained represents the movement of volume of trade as against the value recorded.

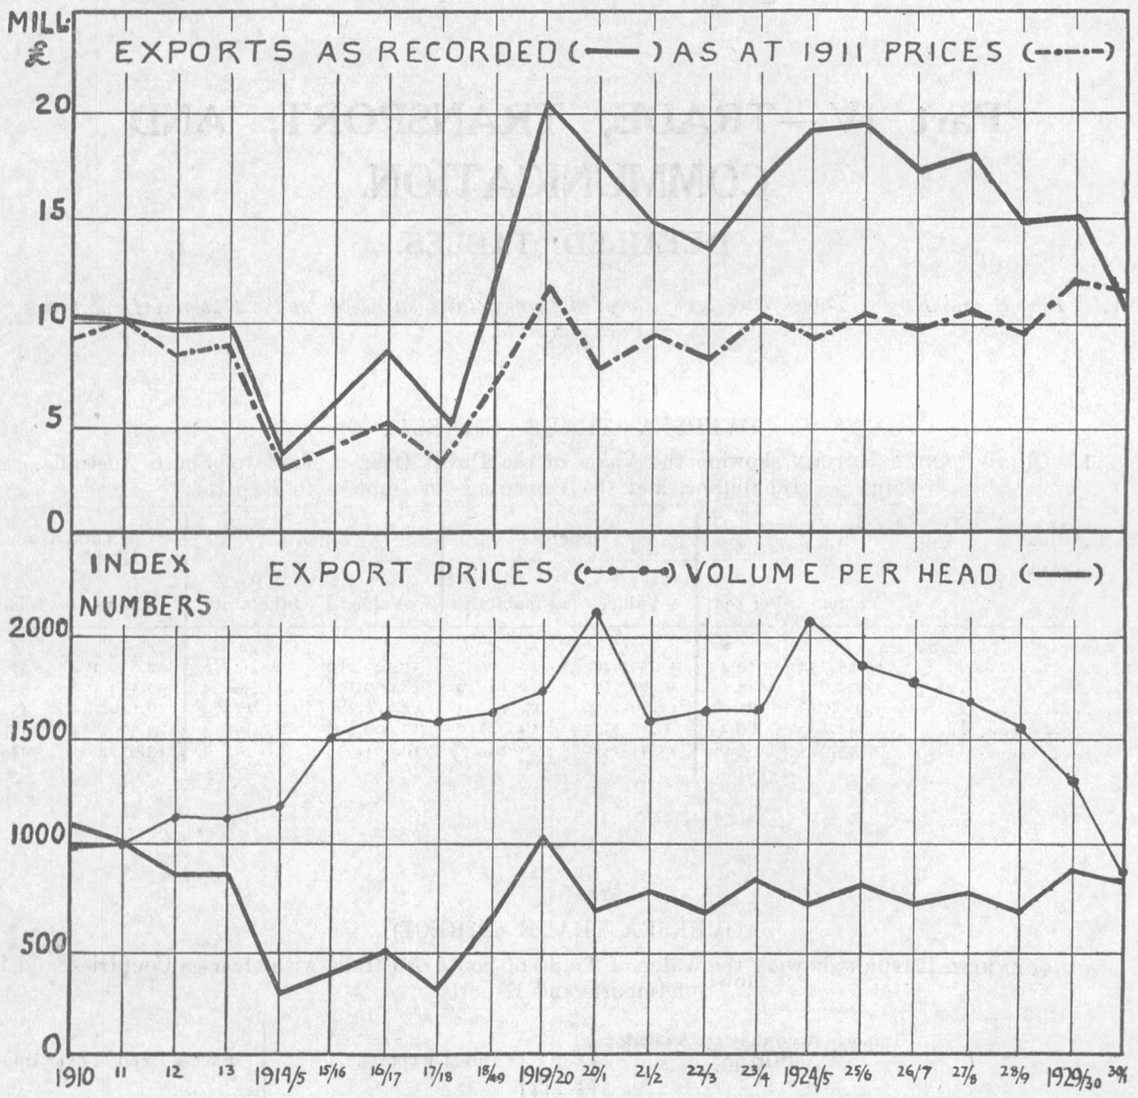
1930-31	10,061,535	11,523,456	1,133	838	866

The high recorded value for 1919-20—£20,530,355—was due to the shipment of accumulated stocks, for during the war years of 1914-15 to 1918-19 very few ships were available. The values as at 1911 mass prices (column 2) have been converted to index numbers (columns 3 and 4), taking the year 1911 as base equal 1,000, and these represent respectively the total volume of the annual exports and the volume per inhabitant. Column (5) gives index numbers representative of the annual movement in export prices. For the whole period from 1911 to 1930-31 the total volume of exports has exceeded the 1911 base six times—1919-20, by 16 per cent.; 1923-24, by 1 per cent.; 1925-26, by 3 per cent.; 1927-28, by 5¼ per cent.; 1929-30 by 18½ per cent., and 1930-31 by 13⅓ per cent.

From the following graphs the State's oversea export trade can be readily traced for the whole period from 1910 to 1930-31.



CUSTOMS AND EXCISE NET REVENUE.

For the year 1930-31 the net revenue was £1,672,285 (£2,993,754), obtained from Customs duties, £1,037,814 (£2,172,027); excise duties, £619,136 (£815,949); and other, £15,335 (£5,778). Nearly forty-one per cent. of the total revenue was derived from Class I.—Ale, Spirits, and Beverages, and Class II.—Tobacco, viz., £683,245 (£1,037,811).

The chief sources of revenue were:—*Ales, Spirit, and Beverages.*—Customs, £43,661 (£142,322); excise, £517,142 (£685,275); total, £560,803 (£827,597). *Tobacco, Cigars, &c.*—Customs, £20,448 (£79,540); excise, £101,213 (£130,674); total, £121,661 (£210,214). *Textile Goods, Apparel, &c.*—£78,775 (£245,974). *Metals and Machinery.*—£128,155 (£388,770). *Vehicles.*—£14,303 (£233,969).

OVERSEA IMPORTS, 1930-31.

(For Alphabetical Index to Items, see Page 18.)

No. 20.—Oversea Imports into the State of South Australia from July 1st, 1930, to June 30th, 1931.

NOTE.—With the exception of Great Britain, New Zealand, and Australia, and in cases where a single country is concerned, only those countries are shown under each article where the value of imports exceeds £100.

Value of Imports.—The value of goods imported from countries beyond the Commonwealth represents the amount on which duty is payable or would be payable if the duty were *ad valorem*.

Quantities.—Generally, but not invariably, quantities have been shown in the ordinary trade unit; where the cental is used, the unit equals 100 pounds avoirdupois. Where imports have been declared in packages without an indication being given of the number, capacity or weight of the articles imported, the values only have been inserted.

N.E.I. means "Not elsewhere included".

Import Duties.—Duties charged on imports into South Australia are collected by the Commonwealth of Australia under various Acts.

(For Alphabetical Index to Items, see Page 18.)

No. 22.—Return showing the Oversea Exports from the State of South Australia for the Year 1930–31.

NOTE.—The difference between the quantities and the value of Australian produce exported and the total quantity and value exported represents the quantity and the value of produce of oversea origin re-exported.

Value of Exports.—The value of goods exported is generally the value in the principal markets of the State in the ordinary commercial acceptation of the term.

Exports of Australian Produce.—Articles which were partly or entirely manufactured from imported materials, raw material produced in the State and manufactures therefrom, are shown under this heading. No distinction is now made in the records between the produce of this State and that of other States of Australia, the whole being classified as Australian.

N.E.I. means "Not elsewhere included."

Ships' Stores.—Goods shipped as "Ships' Stores" on board oversea ships are not included in exports. For ships' stores see Table No. 18.

NOTE.—In compiling the above tables, the mean rainfall in each agricultural county has been first obtained from all available records within or on the borders of the county, and then weighted by the area of the county to obtain the mean rainfall for each Division and the State. Counties Hamley and Young (Murray Mallee), Derby, Lytton, and Taunton (Upper North), and Manchester and York (Western) being non-agricultural counties, are excluded in compiling the average rainfall for this return.

FACTORIES AND WORKS.

A review of the Secondary Industries of the State for the year 1930-31 discloses a continued general decreased activity in comparison with the previous year. The hands employed were less by 8,018, output value by £10,315,329, and the production value by £3,221,537. Though most of the factories worked the full year, many of the averages have been considerably affected by the rationing and short time of the workers. This needs to be remembered when comparing averages for the year with those of previous years.

The following summary shows the State grand total for the last four years, with one year's increases or decreases:—

Salaries and Wages.—At a conference of Australian Statisticians held in 1924, it was agreed that where proprietors worked in the industry, thus occupying, as workers, positions for which they would otherwise need to employ and pay others, they be asked to show values as salaries for such services equivalent to what would have to be paid if employees were engaged in the same work.

For the year 1930-31 there were 1,300 (1,437) working proprietors, and salaries and wages on account of these were returned at £296,276 (£385,777), an average of £228 (£268). It should be remembered that in very many cases proprietors do not put their full time in the works section of their business.

The salaries and wages paid to all employees, including working proprietors, was £4,665,144 (£6,964,963), a decrease of £2,299,819. This represents an average per employee of £185 11s. 2d. (£210). Males received £4,237,794 (£6,373,305), averaging £207 10s. 10d. (£233 16s. 10d.), and females £427,350 (£591,658), averaging £90 10s. 0d. (£100 4s. 2d).

IV.—Total Value of Output and Production.

Output.—With few exceptions this value is representative of the selling value at the factory of all work done during the year. As all selling and distributing costs are excluded from the costs of manufacture previously referred to under headings of salaries and wages, they are also excluded from value of output. For the year this output value has been returned at £19,997,455 (£30,312,784), a decrease of £10,315,329.

Production Value.—The value of production in any industry is defined statistically as the sum available annually for distribution among those concerned in the industry, *i.e.*, workers of all grades in the industry, proprietors (including landlords) of all instruments of production concerned, and the providers

of capital, including debenture holders and mortgagees. This represents the value added to material as a result of treatment, and is estimated for the year at £7,755,112 (£10,976,649), a decrease of £3,221,537, or 29·35 per cent, and is equal to £13 6s. 5d. (£18 18s. 4d.) per inhabitant.

Distribution of Gross Output Value.

The margin between the total expenditure on material, fuel, light, &c., used, salaries and wages paid (including working Proprietors) and the selling value of the output accrues to the manufacturer to cover all overhead charges, depreciation, and profits. For every £100 of output this margin was £15 9s. (£13 4s. 8d.), an increase of £2 4s. 4d. The distribution of each £100 is as follows:—Salaries and wages (excluding working proprietors), £23 6s. 7d. (£22 19s. 7d); fuel, light, &c., £4 2s. 2d. (£4 0s. 2d.); material used, £57 2s. 3d. (£59 15s. 7d.); margin for all other expenses and profit, £15 9s. (£13 4s. 8d.), Total, £100.
